PSk | Kielce University of Technology

CEEPUS Summer School 2026

Artificial Intelligence and Cybersecurity in ICT
- threats and opportunities

Programme

- Introduction to penetration testing
- Applications of artificial intelligence tools
- Epic fails in Information Technology
- Programming challenges of servo motors
- AI and ICT in Forest Fire protection
- and more ....

During this course, participants will have the opportunity to learn about recent trends in Information and Communication Technology. The recent development in an area like Artificial Intelligence offers new opportunities in many areas. The ICT sector is one such area. However, it also warns of the growing challenges posed by cybersecurity threats. In the context of the course described, this means that participants will not only learn about cutting-edge AI developments in ICT but also about the critical need to address cybersecurity issues that have arisen alongside these technological advancements.

Apply for free till 31th January 2026
